Subject: 10 Sept 2017 -- ASPECT Daily Report -- 1330

ASPECT has completed flight operations for 10 Sept 2017 and is transitioning to Addison for mandatory engine preventive maintenance. This maintenance will be conducted from 1830 to 2130 today. ASPECT will depart Addison on 11 Sept 2017 at 0700.

Zone 11 (flight 26) lines (map and lines attached) were flown including 1 to 38 and 48 to 74 of 111 lines. The break in the lines was due to local ATC congestion. It is forecasted that the remainder of the zone will be completed on 11 Sept 2017. It is anticipated that after completion of Zone 11, the survey will continue into Zone 12 (attached).

Statistic for Zone 11 include:

DW = 73 of 123
WW = 15 of 32
RMP = 0 of 0

Flights 24, 25, and 26 will be pulled from the aircraft and processed the evening of 10 Sept 2017. No changes have been made to the n-link or FTP at this time; the n-link is current up through flight 23 and the FTP is current through flight 23.
